EERO's

Pro6, Pro7, EERO Pro, EERO Bases and EERO Beacons

Plumes

We service all models of Plume Pods.

Modem Repair and Lifecycle Services

Quality Cable Services is the industry leader in modem repair lifecycle services. We incorporate all aspects from thorough testing and repackaging to full component level repairs. Complete field ready kits available upon request. Our extensive lab with the latest equipment allows us to service all brands and models. This equipment gives us the ability to update your firmware upon request.

Fiber Internet Equipment Services

Quality Cable Services optimizes the life of your ONT/ONU equipment through our repair and optical port cleaning services. Quality Cable Services is the first to offer these services. We will keep your fiber equipment operating at manufacturers specifications. Servicing all brands.

OSP Gear and Standby Power Supply Services

Here at Quality Cable Services, our skilled RF technicians will provide you with the highest quality repairs on all brands and models of line extenders, trunk and node amplifiers. With precision HP network analyzers at the heart of our test benches, you can be assured your equipment will be back in service quickly.

Our repair services also include the ability to upgrade your line extenders and other amplifiers. Along with repairing optical transmitters and receivers, headend and test equipment repair and calibration.
